Choosing a Heritage Grande

As there is such a wide range of Heritage Grande Models, with numerous options and features, we strongly advise that you seek professional help or telephone our helpline during the planning stage of your project.

Installation Reminders

Always seek professional advice before choosing your Heritage - if in doubt please call our helpline: 01579 345680

There is a Heritage to suit most properties. Please ask for full details about other Models from the Heritage Standard, Heritage Compact and the Heritage Uno ranges.

Installation must comply with the Heritage manual and all current regulations and codes of practice.

All chimneys must be of good quality and function correctly.

INSTALLERS MUST BE APPROPRIATELY REGISTERED;

OFTEC

FOR OIL INSTALLATIONS

10mm to worktops

Oven dimensions:

270mm H x 500mm D x 345mm W

N.B.

All Grande boiler tappings are rear only

THE HERITAGE GRANDE RANGE - FOUR & FIVE OVEN MODELS

For details on Construction, Operation, Response Time, Cooking, Chimney/Flues and Air Vents see the Standard Heritage Range Data Sheet.

Four to Five Ovens . . . The relative temperatures of the two left hand ovens and two right hand ovens can be calibrated on commissioning to suit your requirements. For example, the two top ovens can be calibrated to operate at approximately the same temperature, at which time the temperature of the two lower ovens will be approximately half the temperature of the two top ovens. Alternatively the two left ovens may be calibrated at a lower temperature than their right hand counterparts which provides four different temperature ovens! . . . With the Grande Quintette there is even a fifth oven for additional cooking. This oven operates at a temperature between the top and bottom ovens.

Grande Models Available

1. **The Grande Quintet:** A Five Oven dedicated cooker with an efficient and quiet single burner - programmable for extremely versatile and economic cooking. (Available with large warming plate or electric ceramic hob).
2. **The Grande Host:** A Four Oven cooker as the Quintette plus a generous hot water capability of 8-20,000 BTU's for domestic hot water and a heat leak radiator. This is a two-burner cooker for independent control of cooking / hot water. The range can be operated by means of the oven control or the boiler control depending upon the priority required. (Available with large warming plate or electric ceramic hob).
3. **The Grande Duette:** A Four Oven Central Heating cooker. Two burners, one for cooking, one for the central heating/hot water. There are six models available: 40,000; 60,000; 80,000; 100,000; 120,000; 140,000 BTU's. (Available with large warming plate or electric ceramic hob).
4. **The Super Trio Grande Combination 100:** A Three Oven Central Heating Cooker with 100,000 BTU output combination boiler to provide mains pressure hot water at the turn of a tap, plus central heating. The three ovens provide three different temperatures for the serious cook in addition to the two large hobs. This model comes with an electric ceramic two ring hob. For boiler tapping positions please ask for details (rear only).

N.B. Please consult your heating engineer to check your water pressure and flow rate before choosing a combination Range.

Heritage reserve the right to alter design and specification without prior notification.

Please confirm you have an up-to-date data sheet before ordering.

Please note: This data sheet and description of use is not intended to replace the installation manual supplied with every cooker: all persons installing oil/gas equipment must be registered technicians and should be deemed competent with range cookers, heating systems, flues and also be familiar with relevant Building and Water Regulations. For further advice please call us on 01579 345680.
