N.B. Please do not scale dimensions

## THE HERITAGE GRANDE RANGE - FOUR OVEN MODEL

For details on Construction, Operation, Response Time, Cooking, Oven Vents see the Standard Electric Heritage Range Data Sheet for general information

### General Description

Based on the original style and traditional heavy build quality, it boasts four full sized ovens, two large hobs and an induction or ceramic hob, all independently controlled.

### Construction

The Grande is meticulously built and hand finished using a combination of cast iron and heavy section steel for durability and good heat retention. This is aided by unparalleled levels of insulation to prevent wasted heat and keep cooking temperatures constant. The serviceable components used are only the best - selected for their life expectancy and availability.

### Cooking

By utilizing the traditional principle of vented ovens with indirect heat the 'Heritage' cooks in the same way as all traditional ranges. External oven venting is an option. Ovens can take up to six standard trays (34 x 19cm approx). Each hob takes two/three average saucepans, simmer (right hand) or boil (centre) which provides huge capacity. Hotplates are individually controlled allowing both plates to operate from simmering to boiling. Each oven can be operated independently with the added flexibility of thermostat control.

## Grande Electric Models Available

**The Grande Quadette:** A Four Oven electric cooker with unrivalled power. All four ovens are independently controlled and the range is fitted with three hotplates and a grill.

**N.B.** Heritage reserve the right to alter design and specification without prior notification. Please confirm you have an up-to-date data sheet before ordering.

Please note: This data sheet and description of use is not intended to replace the installation manual supplied with every cooker; all persons installing oil/gas equipment must be registered technicians and should be deemed competent with range cookers, heating systems, flues and also be familiar with relevant Building and Water Regulations.
